Power Source 15 VDC
### Physical

**Size/Weight (Speakers)**
- Height: 9.25 in. (23.1 cm)
- Width: 4.5 in. (11.2 cm)
- Depth: 4.75 in. (11.9 cm)
- Weight: 4.8 lb. (2.2 kg)

**Size/Weight (Speakers II)**
- Height: 6.8 in. (17.5 cm)
- Width: 4.13 in. (10.7 cm)
- Depth: 3.94 in. (10.1 cm)
- Weight: 1.34 lb. (0.612 kg)
Troubleshooting
AppleDesign Powered Speakers
General

The Symptom Charts included in this chapter will help you diagnose specific symptoms related to your product. Because cures are listed on the charts in the order of most likely solution, try the first cure first. Verify whether or not the product continues to exhibit the symptom. If the symptom persists, try the next cure. (Note: If you have replaced a module, reinstall the original module before you proceed to the next cure.)

If you are not sure what the problem is, or if the Symptom Charts do not resolve the problem, refer to the Flowchart for the product family.

For additional assistance, contact Apple Technical Support.
Symptom Charts

One speaker doesn’t produce sound

1. Make sure power cable is securely connected at both ends.
2. Make sure speaker-to-speaker cable is securely connected at both ends.

Speakers produce weak or no sound

1. Make sure computer is on.
2. Make sure all cables are securely connected at both ends.
3. Make sure volume controls are turned up on CD-ROM player, on main speaker, and in computer Sound control panel.
4. AppleDesign Powered Speakers (only): Make sure speakers are on. Press on/off switch so power light above switch is on.
